Protect4S Is Certified as Powered by SAP NetWeaver®

WAGENINGEN, Netherlands: February 17, 2016 — ERP Security B.V. announced today that its security solution [Protect4S](#) has achieved SAP certification as powered by the SAP NetWeaver® technology platform. The solution integrates with SAP NetWeaver and minimizes risk to SAP landscape infrastructures due to hackers and data breaches.

The SAP® Integration and Certification Center (SAP ICC) has certified that Protect4S version 3.0 is powered by SAP NetWeaver.

Solutions that are powered by SAP NetWeaver can be more quickly and easily integrated into SAP solution environments. Customers can benefit from improved interoperability with SAP applications and with the large ecosystem of solutions that run on SAP NetWeaver. Choosing a SAP-certified solution can also help reduce overall IT investment costs and risks.

Protect4S is a software solution that minimizes security vulnerabilities in SAP systems by facilitating and supporting a continuous security process consisting of scanning, analysis and mitigation. Protect4S reduces risk and therefore also possible financial damages due to the exploitation of vulnerabilities. It enables cost-effective mitigation and does not require specialist skills in order to operate.

The certification confirms that Protect4S has a solid technical foundation on the SAP NetWeaver technology platform and that it meets the standards set by SAP. The SAP NetWeaver platform contains many high-quality software components that are reused by Protect4S and is ERP Security's preferred choice in terms of: reliability, performance, functionality and scalability.

About ERP Security B.V.

ERP Security B.V. consists of specialists and developers experienced in SAP security. The company's solutions are based on years of security research that has helped reduce security risks for systems running SAP software. ERP Security's mission is to raise the security of business-critical SAP platforms with minimal impact on day-to-day business.
